

# Risk Factors and Screening Guidelines for the 12 Most Commonly Diagnosed Cancers

Why cancer occurs is not known, but certain things can increase your chances of developing the disease. Cancer risk factors fall into two broad categories—controllable and uncontrollable. Lifestyle or behavioral factors, such as smoking, are controllable. Other factors, such as age and gender, are uncontrollable. In some cases, risk factors may overlap or may work together to increase your risk. Individual risk factors do not mean you will develop cancer but indicate that your risk for developing cancer is increased. If you find that you are at risk for developing cancer, follow the screening guidelines and get regular checkups by your doctor.

Type of Cancer	Risk Factors	Screening Guidelines
Breast cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Female gender</li> <li>Increasing age</li> <li>Family history of breast cancer</li> <li>Personal history of breast cancer</li> <li>History of radiation treatment</li> <li>History of breast biopsy; confirmed atypical hyperplasia</li> <li>Beginning menstrual periods before age 12 or experiencing menopause after age 50</li> <li>Bearing few or no children</li> <li>Having first child after age 30</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Taking birth control pills</li> <li>Taking estrogen replacement therapy</li> <li>Not breast-feeding</li> <li>Alcohol consumption</li> <li>Diet high in fat</li> <li>Lack of exercise</li> </ul>	<p><b>Ages 20–39</b></p> <ul style="list-style-type: none"> <li>Monthly breast self-examination</li> <li>Physical examination of breasts by a physician every three years</li> </ul> <p><b>Age 40 and older</b></p> <ul style="list-style-type: none"> <li>Monthly breast self-examination</li> <li>Physical examination of breasts by a physician every year</li> <li>Screening mammogram every year</li> </ul> <p>Women with strong family histories of breast cancer may benefit from genetic testing for a breast cancer susceptibility gene.</p>
Cervical cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>History of abnormal Pap test</li> <li>Weakened immune system</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Multiple sexual partners</li> <li>History of sexually transmitted viruses</li> <li>Smoking</li> </ul>	<p><b>Age 18 or after becoming sexually active</b></p> <ul style="list-style-type: none"> <li>Yearly Pap test and pelvic examination</li> <li>After three or more consecutive, satisfactory, normal annual examinations, the Pap test may be performed less frequently at the discretion of the physician.</li> </ul>
Colorectal cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Family history of colorectal cancer</li> <li>Personal history of colorectal cancer</li> <li>Personal history of polyps</li> <li>50 years of age and older</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Diet high in fat</li> <li>Obesity</li> <li>Lack of exercise</li> </ul>	<p><b>Age 50 and older</b></p> <ul style="list-style-type: none"> <li>Yearly fecal occult blood test plus flexible sigmoidoscopy every five years <i>or</i></li> <li>Colonoscopy every 10 years <i>or</i></li> <li>Double contrast barium enema every 5–10 years</li> </ul> <p>Those with a personal or family history of colorectal cancer or polyps may need to modify these guidelines.</p>
Leukemia and lymphoma	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>History of chemotherapy</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Benzene exposure</li> <li>High-dose radiation exposure</li> <li>Smoking</li> </ul>	<p>If you have any of these risk factors, discuss them with your healthcare provider.</p>
Liver cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>History of hepatitis B</li> <li>History of hepatitis C</li> <li>History of cirrhosis</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Chemical exposure</li> <li>Anabolic steroid use</li> <li>Tobacco use</li> </ul>	<p>If you have any of these risk factors, discuss them with your healthcare provider.</p>
Lung cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Increasing age</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Smoking</li> <li>Asbestos exposure</li> <li>Carcinogen exposure in workplace</li> <li>Radon gas exposure</li> <li>Lung scarring from certain pneumonias</li> </ul>	<p>If you have any of these risk factors, discuss them with your healthcare provider.</p>
Oral cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Male gender</li> <li>Age older than 60</li> <li>African American race</li> <li>History of gastroesophageal reflux</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Using tobacco products</li> <li>Alcohol consumption</li> <li>Chemical exposure</li> <li>Poor nutrition</li> </ul>	<p><b>Ages 20–40</b></p> <ul style="list-style-type: none"> <li>Cancer-related checkup of the oral cavity every three years</li> </ul> <p><b>Age older than 40</b></p> <ul style="list-style-type: none"> <li>Cancer-related checkup of the oral cavity every year</li> </ul>
Pancreas cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Age older than 60</li> <li>Male gender</li> <li>African American race</li> <li>History of diabetes</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Smoking</li> <li>Diet high in meats</li> <li>Diet high in fats</li> </ul>	<p>If you have any of these risk factors, discuss them with your healthcare provider.</p>
Prostate cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Male gender</li> <li>Increasing age</li> <li>African American race</li> <li>Family history of prostate cancer</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Diet high in fat</li> </ul>	<p><b>Age 50 and older (age 40 and older for people at high risk)</b></p> <ul style="list-style-type: none"> <li>Digital rectal examination by a physician every year</li> <li>Prostate specific antigen test every year</li> </ul>
Skin cancer and melanoma	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Fair skin</li> <li>Male gender</li> <li>Long-term skin problems</li> <li>Weak immune system</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Exposure to strong sunlight or tanning beds</li> <li>Chemical exposure</li> <li>Radiation exposure</li> <li>Psoriasis treatment</li> </ul>	<p>Monthly skin examination</p> <p><b>Ages 20–40</b></p> <ul style="list-style-type: none"> <li>Cancer-related checkup every three years</li> </ul> <p><b>Age older than 40</b></p> <ul style="list-style-type: none"> <li>Cancer-related checkup every year</li> </ul>
Urinary tract cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Caucasian race</li> <li>Age older than 60</li> <li>Chronic bladder problems</li> <li>History of bladder cancer</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Smoking</li> <li>Chemical exposure, especially to aromatic amines</li> </ul>	<p><b>Age 18 and older</b></p> <ul style="list-style-type: none"> <li>If you have any of these risk factors, discuss them with your healthcare provider.</li> </ul>
Uterine and ovarian cancer	<p><b>Uncontrollable</b></p> <ul style="list-style-type: none"> <li>Female gender</li> <li>Family history of uterine or ovarian cancer</li> <li>Personal history of infertility problems, irregular menstrual periods, breast cancer, colorectal cancer, or endometrial hyperplasia (uterine)</li> <li>Bearing few or no children</li> <li>Beginning menstrual periods before age 12 or experiencing menopause after age 50</li> </ul> <p><b>Controllable</b></p> <ul style="list-style-type: none"> <li>Taking fertility drugs (ovarian)</li> <li>Diet high in fat</li> <li>Taking birth control pills</li> </ul>	<p><b>Age 18 and older</b></p> <ul style="list-style-type: none"> <li>Pelvic examination every year</li> <li>Women should be encouraged to report any unexpected bleeding or spotting.</li> </ul>
