

SEPTEMBER 10 & 12, 2024

Dear
To advance the care provided to patients with cancer at our institution, I am requesting to attend the Oncology Nursing Society's virtual conference, ONS Bridge™ on September 10 and 12, 2024.

This two-day, live conference features a robust schedule of evidence-based session topics, and includes an additional day of live roundtable discussions with nurse leaders and fellow attendees. Additionally, I will have access to a library of session recordings available through October 22, 2024, so that I can learn at my own pace without having to disrupt my work schedule.

Designed specifically for oncology nurses in direct patient care, ONS Bridge offers approximately 19 nursing continuing professional development (NCPD) contact hours. Sessions cover a wide range of topics such as updated treatment information, symptom management interventions, oncology nursing trends, and more. The virtual format will allow me to select sessions best suited to our practice and patient needs and doesn't require travel time or expense, which is an efficient use of our continuing education budget.

Opportunities to network with other oncology nursing professionals will enable me to learn how they are improving their practices and processes. We will be able to immediately apply these insights to benefit our patients.

According to ONS, 100% of attendees gain new knowledge and 95% are likely or highly likely to use the information learned to influence practice decisions. The cost of attending is an investment in our institution and patient outcomes.

\$209 (ONS members)
\$289 (nonmembers)

I would be happy to review the conference schedule with you to determine the most valuable ONS Bridge sessions for me to attend. Here are some of the topics that I think would be especially beneficial for me and our nursing staff:

- Three bullet points with horizontal lines for text input.

Attending ONS Bridge will allow me to grow professionally, learn new ways to better meet the needs of our patients, and ultimately contribute to the implementation of positive change at our institution. Thank you for your consideration of this request.

If you would like to learn more information about ONS Bridge, visit n.ons.org/24bridge.

Sincerely,

Oncology Nursing Society
