### **Publisher's Note**

This book is published by the Oncology Nursing Society (ONS). ONS neither represents nor guarantees that the practices described herein will, if followed, ensure safe and effective patient care. The recommendations contained in this book reflect ONS's judgment regarding the state of general knowledge and practice in the field as of the date of publication. The recommendations may not be appropriate for use in all circumstances. Those who use this book should make their own determinations regarding specific safe and appropriate patient-care practices, taking into account the personnel, equipment, and practices available at the hospital or other facility at which they are located. The editors and publisher cannot be held responsible for any liability incurred as a consequence from the use or application of any of the contents of this book. Figures and tables are used as examples only. They are not meant to be all-inclusive, nor do they represent endorsement of any particular institution by ONS. Mention of specific products and opinions related to those products do not indicate or imply endorsement by ONS. Web sites mentioned are provided for information only; the hosts are responsible for their own content and availability. Unless otherwise indicated, dollar amounts reflect U.S. dollars.

ONS publications are originally published in English. Publishers wishing to translate ONS publications must contact the ONS Publishing Division about licensing arrangements. ONS publications cannot be translated without obtaining written permission from ONS. (Individual tables and figures that are reprinted or adapted require additional permission from the original source.) Because translations from English may not always be accurate or precise, ONS disclaims any responsibility for inaccuracies in words or meaning that may occur as a result of the translation. Readers relying on precise information should check the original English version.
